

6 THINGS YOU CAN DO TO PROTECT YOUR PHARMACIST!

Pharmacists, like other frontline healthcare professionals, are risking their lives for the well-being of their patients during COVID-19 pandemic. Here is what you can do to protect them:

1 If you are not feeling well, **DO NOT** visit the pharmacy. Arrange for delivery or have someone else pick up your medication.

2 Try calling or emailing the pharmacy before visiting for a quick pickup of your prescription medications or have them delivered to your home.

3 If you do go into the pharmacy, avoid unnecessary touching of merchandise, counter, payment machine and other store items.

4 Wash your hands or use hand sanitizer before going to the counter.

5 Exercise social distancing by avoiding physical contact with your pharmacist and technicians. Keep a distance of 6 feet from staff and other visitors.

6 These are challenging times for all of us. Be patient with your pharmacist and their staff.
