**Agenda**

**Please RSVP**

## LEARNING OBJECTIVES

### Module #1

To describe current global recommendations to help minimize over-use of short-acting beta-agonists as monotherapy and optimize controller therapy.

### Module #2

Upon completion of this presentation, pharmacists will be able to:

- Assess the level of control of an asthma patient
- Identify opportunities in the pharmacy to optimize asthma control for their patients
- List common drug therapy problems in patients with asthma that may lead to increased risk of exacerbations
- Apply strategies to effectively assess, intervene and partner with patients and their healthcare providers to improve asthma care
